

JENNY WALLER

FUTURE FRONT END DEVELOPER

jenny.waller@medieinstitutet.se | www.jenwaller.se | Karlstad

Living in Karlstad, previously educated in Media Studies and with a love for being creative with colors, forms, communications and to work administratively and with order. I am now studying for Front End Developer via the Media Institute and am applying for LIA for the period 2023-10-23 to 2023-12-29.

One of the best things I know, is to get a design, and then make this design come to "life" through HTML, CSS and JavaScript, and to make sure that the web app not only look good, but also is user-friendly and adapted to all from an accessibility perspective. Working in a structured way, finding solutions and at the same time working with graphic elements is the reason why I want to work as a Front End Developer.

My strengths are that I am solution-oriented, flexible and can easily get an overview of upcoming projects. I have an eye for details, to think about how the whole is experienced by the user and personally I always want to develop. If there's something I can't do, I'll make sure to figure out how to do it!
